Microsoft Cloud + AI in Healthcare

Clinical workflows, secure data, and measurable patient outcomes

EXECUTIVE SUMMARY
Executive summary: unify EHR data, enable clinician copilots, and reduce admin time.

KEY USE CASES
Use cases: care coordination, revenue cycle automation, diagnostics triage.

LEARNING PATHWAY
Learning pathway: Power Platform, Azure data services, Responsible AI labs.

MEASUREMENT
KPIs to track: time-to-chart, readmission risk, security posture, ROI per cohort.

90-DAY LAUNCH
90-day launch: stakeholder alignment, pilot cohort, production rollout.
